## New Mystery Novel Set in the Boone, NC, Area Releases December 9th, 2014

FOR IMMEDIATE RELEASE

UnWrecked Press announces a new paranormal mystery novel entitled *Finders, Inc.* by North Carolina author Michael Jasper. The book launches on **December 9th, 2014**, and it takes place in the mountains of North Carolina, specifically in the region of Boone and Blowing Rock.

The back cover copy follows:

*Sometimes those who can't be found just might not be lost...*

As co-founders of Finders, Inc., Hank Johnson and Bim Mayer have spent the past two decades solving mysteries and—almost miraculously, in many instances—finding missing people in the remote mountain town of Boone, North Carolina. Until now.

Their most recent case deals with an outbreak of missing elderly people, all of whom used to teach at a nearby university. They soon learn that the absent old folks all have something else in common: they're all connected to a shady character with deep, dark ties to both Bim and Hanky J.

The events of those chaotic three days in late winter will test the friendship of the two men as they—and the other members of the “Finder Team”—risk their lives to find a group of people who just might not *want* to be found.

The first book in an all-new mystery series (with hints of the paranormal), by Michael Jasper, author of *Family, Pack, The Wannoshay Cycle*, and *The All Nations Team*.

Readers can find this 204-page mystery novel in both **trade paperback** (\$15.95) and **ebook** (\$4.99) format, from a range of bookstores and electronic outlets. The print ISBN is **978-0692309360**.
